Good concept but the game is a bit disordered. Buy only if you have cents to spend gg..... Why, i thought it was multiplayer but no it was not that bad just being singleplayer but next how crappy it is the 3 computer bots or more. The bots keep aiming and killing me first then its like watching a football match while your having a penalty i don't recomend getting this crappy game.. So disappointed, but for under \$1.50 I'm not surprised. It's too bad really, I thought someone would have a stick fight perfected for single player to fill the time when you can't find other players for the real deal.

But this game is not it. the controls are so broken you're pretty much flying deadstick (sorry).

The shooting is automatic,both tracking and firing(the former being too much better than the later), meaning it's all about the guns and getting them first. thankfully the AI is so dumb that it's not to hard to do, even with the bad "ice floor" effect.

But if you don't get a gun, your defenseless because there is no melee, though somehow your gun can be stolen?

The weirdest thing, is that the "up" control in the input section is wrong, your jump is space bar?

I would rather play flag waving simulator with no wind than to see someone else pay for this bad game.. This Game Its Good Bcs Its New And We Expect More Updates In The Future Like Multiplayer And Avatars More Weapons And That Make The Game More Fun And We Are Waiting A Good Work From The Programers ^-^.
